## CWS Outcomes – At A Glance (July 2019 Report)

Acronym/Terminology	Definition
Baseline	Same time frame 5 years prior used as a starting point data for measures upon which progress towards improving outcomes for children are measured.
Building (creating) Family Connections	Services intended to support and develop beneficial, familial relationships and connections between foster youth and family members.
CFT-Child and Family Team	Meeting that brings together people who are interested in and care about the family (social workers, family members, and caregivers), to ensure the best possible decisions are made about the child's safety and/or placement, while preserving family and community connections.
Concurrent Planning Services	A case plan which involves a child's permanency alternatives in the event that reunification efforts fail.
CWS/CMS-Child Welfare System/Case Management System	A comprehensive statewide index and case management system for Child Welfare Services in California.
DR-Differential Response	A strategy used to determine a response to child abuse/neglect reports which best meets families needs. Three paths: Path 1-Community Only; Path 2- Community and Agency; Path 3-Agency Only.
ER-Emergency Response	Activities and services performed by a social worker to assess, investigate, and resolve a report of child maltreatment within a family.
First Step-First Step Assessment Center	At the time of entry to Orangewood, an assessment is initiated with relatives and non-relatives for possible placement within 23 hours.
FR-Family Reunification	Time limited program designed to provide services and support with the ultimate goal of bringing the family back together.
=> Expedited Family Reunification	Intensive services to reunify families quickly.
FRC-Family Resource Center	Support services to children and families delivered through community-based collaboratives operating Family Resource Centers.
Ice Breakers	Informal, child-focused meetings held within 10 calendar days after a child is placed in out of home care. This facilitates the sharing of information and team building between the child's parents and caregivers.
Legally Free	When a child's parents or guardians have relinquished their parental rights or have had them terminated in a court of law. Once this has occurred a child is then "legally free" to be adopted by another person or family member.
Mutual Client	To coordinate, integrate and enhance Agency service delivery to clients with open or pending California Work Opportunity and Responsibility for Kids (CalWORKs) case <u>and</u> an open Children and Family Services (CFS) case or active referral.
Parachute Case Protocols	Children's (PIT) placed with some or all of their siblings
RFA-Resource Family Approval	A single unified process for approving individuals and families for foster care, legal guardianship, and adoption.
Regionalization	Geographically locating facilities, staff and services near or within the neighborhoods of groups of clients or customers.
Percent of Target Change from Same Time Last Year	SSWs identify and treat complex individual or family social problems in order to develop or restore social functioning.
SCI-Special Care Increment	Funding intended to augment the provision of basic support for children in placement based upon the special needs of the child.
SDM-Structured Decision Making	Research-based assessment tool used by social workers to help determine the safety, risk and service needs of children and families.
TPR-Termination of Parental Rights	Termination of parental rights means that all living parents who may have a potential legal claim to the child have been terminated and they no longer have any rights or responsibilities to that child. In dependency cases, this usually means an involuntary relinquishment based upon certain conditions and guided by mandated timelines.
Wrap-Wraparound	Program that provides unique, individualized services for eligible children through a collaboration between the Health Care Agency, Probation, and the Social Services Agency.
